An astonishing $2.47 billion was donated to U.S. nonprofits by a reported 34.8 million people on Giving Tuesday in 2020. It was surprising and although 2020 sparked a wave of giving, there were some sparks of giving in certain cause areas and the median nonprofit experienced lower results. Also, the number of organizations failing to fundraise increased dramatically in 2020.

Organizations shouldn’t shy away from engaging their supporters, even when times are tough. We know that people are motivated to give, but they need to be given the opportunity to do so.

You can use this list below to walk through your Giving Tuesday Campaign strategy. Check off what you have, then work back from the beginning to develop the most successful campaign. Don’t worry if some things are not attainable, doing something is better than nothing!
